

4650 BACK SUPPLY 4655 TOP SUPPLY

Floor Mounted, Floor Outlet

These Toilet Fixtures are designed for high security areas without an accessible pipe chase. The fixtures are fabricated using heavy gauge type 304 stainless steel, seamlessly welded to form a one piece, vandal resistant unit. Internal piping is stainless steel. Exposed surfaces have a satin finish, except for the integral seat which is polished to a bright mirror finish.

PERFORMANCE

Metcraft bowls and assemblies are designed to withstand 5000 lb. (22kN) loading without permanent deflection and damage. They meet or exceed ASME 112.19.6M for hydraulic performance and ASME 112.19.2M for physical dimensions. The trap will pass a 2 5/8" (67mm) dia. ball. A minimum 1" (25mm) supply of 25psi (172kPa) flushing pressure is required.

Water Consumption:

With a water saver flush valve - 3.5 gpf (13 liters)

With a low consumption flush valve - 1.6 gpf (6 liters)

INSTALLATION

The fixtures are supplied with six 5/8" (16mm) threaded steel studs and tamper resistant cap nuts (four in the back and two in the floor). Two 3/8" (10mm) dia. 6" (152mm) on center mounting holes are provided for mounting to waste flange (waste flange provided by other manufacturers). The installer must provide wall openings for piping per rough-in drawings provided by Metcraft. Fixture meets A.D.A. requirements when installed per A.D.A. guidelines. Toilet must first be set in place and sealed to closet flange.

RECOMMENDED FLUSH VALVES
