Metcraft's hospital fixtures are the highest quality products in their class. Compare Metcraft hospital fixtures to our competitors and you will quickly see the superior design and construction details.

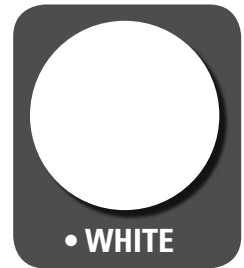

An unoccupied ICU/CCU bed represents thousands of dollars per day of lost revenue. Therefore, a hospital can not afford to have any beds unoccupied because of equipment malfunctions.

That's why Metcraft has designed our hospital fixtures with quality, durability and sanitation in mind.

Metcraft has been manufacturing hospital fixtures for over 20 years. Our years of experience has helped us develop a hospital fixture that truly meets your requirements.

POWDER COATED COLOR AVAILABLE

Some Metcraft stainless steel fixtures may be ordered with special colors. Color is applied electrostatically to enhance appearance and provide a hard finish that is resistant to soiling and scratching. A variety of colors are offered to complement ambient décor. Color is vandal resistant, however this option should not be chosen for fixtures installed in facilities where *severe* vandalism is commonplace.

BARIATRIC TOILET

WALL HUNG

Powder Coated Color

Metcraft's bariatric toilet is the strongest fixture on the market, yet it has the appearance of any other commercial porcelain china toilet. The reason? Metcraft's fixture is constructed of 14 GA's/s with a white powder coating to give it the look of porcelain china. The unit also features Metcraft's new 1.28 HET technology to give our customers the added advantage of water conservation.

FLOOR MOUNTED

Powder Coated Color

SCRUB SINK

Metcraft's stainless steel surgical scrub sinks assure durability and easy care. The rounded interior corners and sloped basin minimize cleaning time and prevent splashing. Standard optical sensor faucets reduce the possibility of transferring germs.

Optional trim and accessories are available for specification.

Model Selection	
Single Station	9111-1
Two Station	9211-1
Three Station	9311-1

Options and Accessories:

- TMX Thermostatic Mixing Valve
- LFC Laminar Flow Control for Spout

Options and Accessories:

Sensor operated faucet (SOV)

Foot pedal valve (FOV)

#204 thermostatic mixing valve

Pushbutton metering valves (POV)

Options and Accessories:

#204-Concealed Thermostatic mixing valve assembly

HAND WASH SINK

Metcraft's attractive hand wash sinks are ideal for patient examination rooms. The solid surface counter top is complemented with a durable basin under mounted. Large radius corners make basin cleaning easy. The stainless steel pedestal cabinet conceals unsightly piping and provides a solid mounting base.

WASH CONSOLE

Our hand wash wall consoles provide a compact installation for hand washing that includes a paper towel dispenser, a mirror and a liquid soap tank and soap dispenser. Piping is concealed inside the wall mounted cabinet and is accessible through a large access panel underneath the lavatory.

MOP SINK

Metcraft's stainless steel mop sinks provide the ultimate in durability. Forget concerns about chipping, cracking and staining. Large radius interior corners make clean up quick and easy. A wide variety of styles and models are available.

Options and Accessories:

Tile Flange
(Left, Right and/or Back Side)

1" Deep Backsplash
(Left, Right and/or Back Side)
w/ specific height

1-station stainless steel mop holder.

3-station stainless steel mop holder.

Hose and Holder Assembly.

SERVICE SINK

Our stainless steel service sinks provide durability without bothersome and unsanitary rim guards and chipped porcelain. Large radius interior corners allow quick and easy cleaning. Faucets and trim may be specified separately if desired.

Options and Accessories:

Flat strainer drain 1-1/2" IPS outlet.

Cast Iron P-Trap 2" IPS outlet.

Single Sink Faucet w/ Hose
thread outlet.

Service Sink Faucet w/ Vacuum
breaker & hose thread outlet.

Service Sink Faucet w/ Wall brace,
Vacuum breaker & Hose thread
outlet.

DIALYSIS BOX

Metcraft's dialysis boxes provide a convenient water and drain connection for dialysis service. Recessed wall boxes use Type 316 stainless steel for resistance to aggressive water conditions. Boxes are provided with polypropylene ball valves and hose hanger bracket. Waste outlet tube is a plain end 2" nominal pipe size.

Options and Accessories:

Tamper-proof wall frame screws.
 *1/4 Turn latch instead of keyed lock.

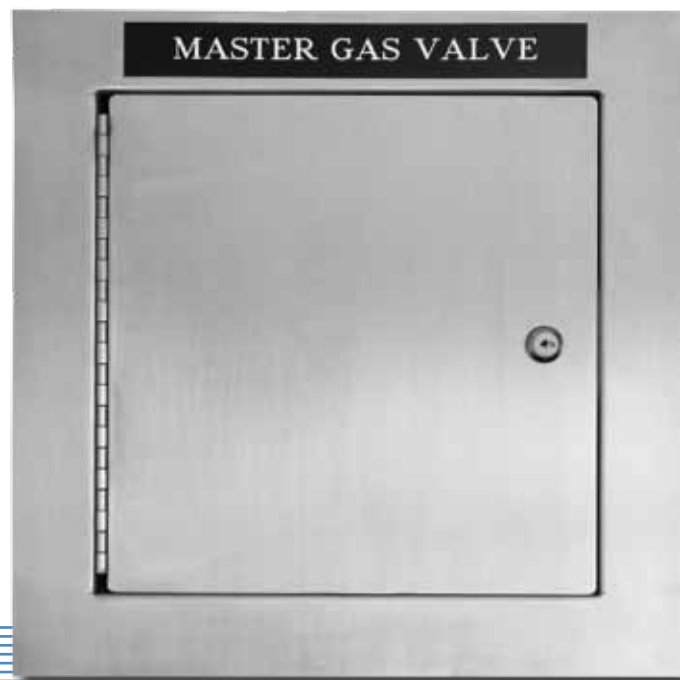

**A662 and A663 models only*

Model Selection	
Single Valve	A660
Double Valve	A661
Single Valve - With Locking Door	A662
Double Valve - With Locking Door	A663

Options and Accessories:

Quarter turn latch in place of cylinder lock.
 Quarter turn latch with finger ring in place of cylinder lock.

MASTER GAS VALVE BOX

Metcraft boxes feature one-piece stainless steel construction with a hinged door and cylinder lock. A self-adhesive "MASTER GAS VALVE" logo is included. Holes for piping must be cut by the installer.

HOSE BOX

Our recessed hose boxes provide convenient water supply connections for finished interior and exterior areas. Models with hinged doors and cylinder locks are available for areas subject to vandalism.

Model Selection: With Drain Outlet	
Single Valve	A630
Double Valve	A631
Single Valve - With Door	A632
Double Valve - With Door	A633

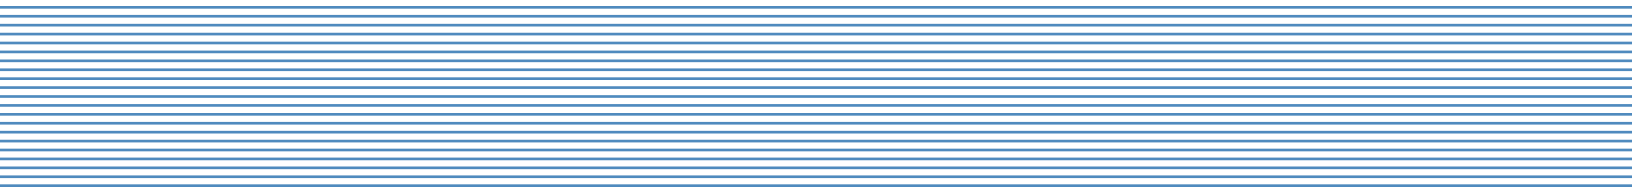

Model Selection: Without Drain Outlet	
Single Valve	A640
Double Valve	A641
Single Valve - With Door	A642
Double Valve - With Door	A643

CUSTOM FLOOR DRAIN

Metcraft's heavy gauge, all stainless steel, shallow floor drain features a plain end waste outlet 1-1/2" nominal pipe size. The shallow depth allows it to be installed in thinner poured floors. The removable strainer is secured with tamper resistant stainless steel screws.
